DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-7, 30-38, and 64-69, drawn to determination of path, classified in class 382, subclass 190.
 - II. Claim 8-18 and 39-50, drawn to adaptive coding, classified in class 382, subclass 239.
 - III. Claim 19-29 and 51-61, drawn to run-length coding, classified in class 382, subclass 245.
2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as feature extraction for pattern recognition, subcombination II has separate utility such as compression depending on the history, activity or busyness and subcombination III has separate utility such as entropy encoding. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2624

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
